Slide 1: Title (30 sec):**Swara**

"Good [morning/afternoon], respected judges.

Let me start with one simple picture:
You're driving home and see an injured dog lying on the roadside. You want to help — but you don't know *whom to call, which NGO to trust, or how your money will actually support.*
This helpless gap is the reality for millions of Indians every single day.

Shruti-We are **Swara and Shruti**, and we're here to introduce **PawBridge — Digital Bridge: A Unified platform for animal welfare.** From report to rescue, from compassion to impact."

Slide 2: The Human & Animal Crisis (45 sec):**Swara**

"India is home to over 60 million street dogs.

In 2024 alone, 3.72 million dog-bite cases were reported across the country.

The challenge is not that people don't care — it's that the response is fragmented.

NGOs are underfunded, coordination is poor, and as a result rescues are 'slow' and public trust remains 'low'.

This is where PawBridge steps in."

Slide 3: A Growing Opportunity in Pet Care (45 sec):**Shruti**

“The Pet Care Industry is already booming. Valued at ‘₹7,987 crore in 2024’, Projected to reach ₹2,10,000 crore by 2032, growing at 20% CAGR.

Today, India has 32 million pets, and owners spend an average of ₹50,000 per year per pet — with around ₹14,000 spent on healthcare alone.

Alongside this, corporates are allocating significant CSR funds to animal welfare.

This proves the opportunity: there’s money, there’s compassion — but no unified system.”

Slide 4: Addressing the Critical Gap (45 sec)**-Swara**

“Currently, there is no single platform that allows citizens to report injured animals, track rescues, donate transparently, volunteer, or adopt — all in one place.

NGOs remain fragmented and often opaque.

And because of this, the public lacks trust, while NGOs lack support.

A vast community of people who care — citizens, pet lovers, CSR teams — have no trusted infrastructure to act.”

Slide 5: PawBridge – Our Solution (1 min)**-Shruti**

“PawBridge is that missing bridge.

Here’s what we offer:

Geo-tagged incident reporting — citizens upload photos, location, and instantly alert the nearest NGO.

NGO management dashboard — to track rescues, Ngos trained for abuse reporting will receive abuse reports,manage volunteers, and list adoptions.

Transparent donation module— donors see exactly where their contribution goes.

CSR & brand partnerships — corporates support verified projects, boosting trust and funding.

With PawBridge, compassion turns into quick, transparent action."

Slide 6: Business Model & Revenue Streams (1 min)**-Swara and Shruti**

"Our business model is diversified and scalable:

Donation transaction fees — 2–3% commission. **Swara**

CSR tie-ups — corporates funding projects. **Shruti**

Pet brand ads & collaborations — food, vets, grooming. . **Swara**

Affiliate marketing And Social Media Presence and Marketing— monetizing pet products & services. **Shruti**

This ensures sustainability while creating impact."

Slide 7: Competitive Advantage & Moat (45 sec) - **Swara**

“Our competitive edge is clear:

Unmatched trust & transparency with live tracking and donor feedback.

First mover advantage — no one else offers a unified platform for rescue, adoption, donations, and CSR.

Tech & data insights — mapping hotspots, optimizing rescues.

Strategic partnerships — deep collaboration with NGOs and local governments.

This makes PawBridge not just unique, but defensible.”

Slide 8: Go-to-Market & Scaling (45 sec)- **Shruti**

“Our scaling strategy is phased:

Phase 1: Pilot in one city, onboarding 5–10 NGOs, testing and validating and pet service integrations.

Phase 2: Expand to top 10 cities, secure CSR partnerships, influencer campaigns, and pilot with local municipalities.

Phase 3: Nationwide roll-out, including Tier 2 and Tier 3 cities and incorporation of government bodies.

This roadmap ensures measured, scalable growth.”

Slide 9: Impact & Financial Ask (45 sec) - **Swara**

“By Year 3, PawBridge will have:

* Rescued 50,000+ animals,

* Reduced dog-bite cases in pilot areas by 20–30%,

* Delivered measurable social ROI — lives saved, diseases prevented, safer communities.

To achieve this, we seek ₹5–10 lakh in seed funding, which will go into product development, NGO onboarding, and marketing."

Slide 10: Closing (30 sec)

"Judges, PawBridge is more than a platform — it's a movement.

A movement that turns citizen compassion into lasting impact, while unlocking a massive market and delivering sustainable returns.

With PawBridge, *every paw will matter.*

Thank you."

2. Why Affiliate, Ads, CSR & Commission are Logical

Unlike pet food manufacturers (who produce & sell physical goods), PawBridge is a **platform**. That means your **cost structure is lighter**, and revenue comes from:

- **Affiliate Marketing** → Commission when your users buy from pet service partners (e.g., a user clicks a link to Pedigree, Royal Canin, or a vet clinic appointment).

- **Social Media Marketing & Ads** → Sponsored campaigns from pet brands, NGOs, or corporates.
- **Pet Industry Collaborations** → Paid partnerships with grooming centers, boarding facilities, clinics.
- **CSR Activities** → Corporates allocate funds for animal welfare projects, and PawBridge facilitates this (you earn facilitation/partnership fees).
- **Donations (2–3% Commission)** → Every ₹100 raised on your platform → PawBridge keeps ₹2–3, rest goes to NGOs.

👉 This model is **scalable**, doesn't require you to own shelters or vehicles, and ties revenue directly to **transactions & partnerships**.

How Projections Are Configured (Sample)

When you show **financials**, you need to justify them. Here's a **conservative breakdown**:

Year 1 – Pilot Phase (one city, 5–10 NGOs)

- 5,000 small donations avg. ₹200 each → ₹10 lakh donations → 3% = **₹30k revenue**
- 5 CSR tie-ups (~₹2 lakh each) → **₹10 lakh revenue**
- 10 brand campaigns (~₹50k each) → **₹5 lakh revenue**
- Affiliate/ad commissions → **₹2 lakh revenue**

  👉 **Total Year 1 ≈ ₹17–20 lakh**

Year 3 – Expansion (10 cities, 200 NGOs)

- 1 lakh donations avg. ₹300 → ₹3 crore donations → 3% = **₹9 lakh revenue**
- 30 CSR tie-ups (~₹5 lakh each) → **₹1.5 crore**
- 100 brand campaigns (~₹1 lakh each) → **₹1 crore**
- Affiliate/ad commissions → **₹30–40 lakh**

  👉 **Total Year 3 ≈ ₹3–3.5 crore**

4. Why this is business, not NGO

- An NGO *spends* money to rescue.
- PawBridge *earns* money by enabling and scaling rescues.
- NGOs are charity-driven → PawBridge is **transaction + commission driven**.

So while the **impact is social**, the **model is commercial**.
This is called an **impact venture** → like Ketto (crowdfunding), Milaap, or GiveIndia.

If they ask: *"Why is this a business and not just an NGO service?"*
Say this:

"PawBridge is not an NGO. We don't do rescues ourselves. We are the digital platform that connects citizens, NGOs, corporates, and pet brands. Every transaction that flows

through PawBridge — a donation, a CSR fund, a pet brand ad, or an affiliate purchase — generates a small commission or fee for us. That makes it a transaction-driven, revenue-generating business, not a charity. The difference is: NGOs spend money to rescue; we enable rescues and earn money by scaling the ecosystem."
